

## 2 PIECE CONTI SUIT POLY COTTON – YELLOW LABEL – ACID RESISTANT

### CHARACTERISTICS

- Acid resistant, treated poly cotton
- Triple stitched seams
- YKK zipper on jacket & trousers
- All stress points are bar tacked
- Monza pocket on jacket
- 5 belt loops
- Generous sizing
- Available sizes – see below

Acid  
Resistant

**Green (Sizes 34-62)  
CZAGAR**

**Warm Water**  
Subject to 3% shrinkage

**Do not bleach**

**Cool iron**

**Do not dry clean**

**Do not tumble dry**

**Acid  
Resistant**

## **Acid Resist Finish – Poly Cotton**

The Acid Resist finish is really a water-resistant finish that is not destroyed by the action of acids or other chemicals provided that the garment is cared for in the correct manner. (See washing instructions on Data Sheet)  
It does not allow the cloth to be wetted by the acids and is therefore “acid resist”.

The finish performs to the ISO6530 test method where concentrated acids – Hydrochloric, Sulphuric and Nitric are used to test the finish according to the above test method. A strong alkali (caustic soda) is also used to determine the fabric’s resistance to alkalis.

The chemical used in the finish is a Fluorocarbon and is permanent. It should not lose its effect after many washes (the finish can last up to 50 washes) however, the washing procedure must include a thorough rinsing to remove any wetting agents followed by a hot ironing to regenerate the finish effect.

**Disclaimer:**

The information provided in this data sheet is correct to the best of our knowledge. Information given is designed only as a guidance for safe handling use.
